

World Times for Chinese New Year 2014 year of Horse

Find out what time Chinese New Year 2014 starts in your country.

Are you really prepared for 2014?

On January 31st 2014 we enter a new Solar Chinese year (year 4712th in the Chinese calendar), the year of the Yang Wood Horse (Jia Wu). Please do not get confused with solar and lunar calendars, more on this below.

Chinese New Year 2014:

Chinese New Year (according to the lunar calendar) starts on the 31st January 2014 and is celebrated by the Chinese all over the world. It heralds new beginnings and a fresh start. At a social level, it is very much a family affair, a time of reunion, forgiveness, sharing and thanksgiving. In 2014 Chinese New Year falls on Friday January 31st 2014 at 05.40 (am) China (Lunar calendar), Thursday 30th 21.40 United Kingdom, Thursday 30th 13.40 California USA, and Thursday 30th 22.40 Barcelona Spain. Due to time differences around the world Chinese New Year will fall what appears to be a day early in some countries. Below you will find a Chinese New Year world time converter 2014 table to assist you. This is the date you celebrate the Chinese New Year with **Ang Pow**, fireworks etc and not the date you use to place your **2014 cures and enhancers** in Feng Shui (February 4th 2014).

The Lunar Chinese New Year Day is very different from the Solar (Hsia) New Year Day (February 4th 2014). The Lunar Calendar formulates the days of the month according to the cycle of the moon whereas the solar year is governed by the sun. Although the Chinese solar year starts on a different date from the western year, the theory whereby the year is calculated on how long it takes the earth to go round the sun is the same. The lunar cycle lasts approximately 29.5 days and in order that the start of the Lunar New Year is not too far removed from the Solar New Year, the Chinese insert an extra month, this being called an intercalary month, once every few years. This is why Chinese New Year Day falls on a different date in each of the two calendars.

Whilst the solar (Hsia) calendar starts the New Year at the beginning of Spring, which falls normally between the 4th and 5th of February, the lunar (yueh) calendar marks the New Year on the second New moon after the winter solstice. In 2014, Lunar Chinese New Year also called the 'Spring Festival', falls on 31st January 2014 which is the New Year that is celebrated by all ethnic Chinese. The solar New Year (4th February 2014) is not celebrated at all and only used for Feng Shui placement.

You may have come across a few websites stating that 2014 is the 4711th Chinese New Year, if you cannot find the reason, here is an answer for you:

The Yellow King's appointment was held in the spring of 2697 B.C. But they used the winter solstice day as the first day of the year. So the first winter solstice was on around December 23rd, 2698 B.C. Today's January 1st means nothing to the Yellow King. If we count that extra eight days in 2698 B.C. for a year, then year 2014 is the 4712th Chinese year.

Chinese New Year 2014 World times.

Friday, 31 January 2014, 05:40 Hong Kong time. This is the date that Chinese New Year would be celebrated.
