

World Times for Chinese New Year 2015 year of Goat/Sheep

Find out what time Chinese New Year 2015 starts in your country.

Are you *really* prepared for 2015?

On February 19th 2015 (China time) we enter a new Lunar Chinese year (year 4713th in the Chinese calendar), the year of the Yin Wood Goat (Yi Wei). Please do not get confused with solar and lunar calendars, more on this below.

Chinese New Year 2015:

Chinese New Year (according to the lunar calendar) starts on the 19th February 2015 and is hugely celebrated worldwide by the Chinese. The Chinese New Year heralds new beginnings and a fresh start for all. At a social level, Chinese New Year is very much a family event and is a time of reunion, forgiveness, sharing and thanksgiving with festivities. In 2015, Chinese New Year falls on Thursday 19th February 2015 at 07.47 (am) China (Lunar calendar), Thursday 19th 21.40 United Kingdom, Wednesday 18th 18.47 California USA, and Thursday 19th 00.47 Barcelona Spain and a full list of all the other countries can be found below.

Due to time differences around the world, Chinese New Year will fall what appears to be a day early in some countries. Below you will find a Chinese New Year world time converter 2015 table to assist you. This is the date you celebrate the Chinese New Year with **Ang Pow**, fireworks etc and not the date you use to place your **2015 cures and enhancers** in Feng Shui (February 4th 2015).

The Lunar Chinese New Year Day is very different from the Solar (Hsia) New Year Day (February 4th 2015). The Lunar Calendar formulates the days of the month according to the cycle of the moon whereas the solar year is governed by the sun. Although the Chinese solar year starts on a different date from the western year, the theory whereby the year is calculated on how long it takes the earth to go round the sun is the same.

The lunar cycle lasts approximately 29.5 days and in order that the start of the Lunar New Year is not too far removed from the Solar New Year, the Chinese insert an extra month, this being called an intercalary month, once every few years. This is why Chinese New Year Day falls on a different date in each of the two calendars.

Whilst the solar (Hsia) calendar starts the New Year at the beginning of Spring, which falls normally between the 4th and 5th of February, the lunar (yueh) calendar marks the New Year on the second New moon after the winter solstice. In 2015, Lunar Chinese New Year also called the 'Spring Festival', falls on 19th February 2015 which is the New Year that is celebrated by all ethnic Chinese. The solar New Year (4th February 2015) is not celebrated at all and only used for Feng Shui placement.

You may have come across a few websites stating that 2015 is the 4712th Chinese New Year, if you cannot find the reason, here is an answer for you:

The Yellow King's appointment was held in the spring of 2697 B.C. But they used the winter solstice day as the first day of the year. So the first winter solstice was on around December 23rd, 2698 B.C. Today's January 1st means nothing to the Yellow King. If we count that extra eight days in 2698 B.C. for a year, then year 2015 is the 4713th Chinese year.

Chinese New Year 2015 World times.

Thursday 19th February 2015, 07:47 Hong Kong time. This is the date that Chinese New Year would be celebrated.
