

World Times for Chinese New Year 2017 year of the Rooster

Find out what time Chinese New Year 2017 starts in your country.

Are you really prepared for 2017?

On January 28th 2017 (China time) we enter a new Lunar Chinese year (year 4715th in the Chinese calendar), the year of the Yin Fire Rooster (Ding Yu). Please do not get confused with solar and lunar calendars, more on this below.

Chinese New Year 2017:

Chinese New Year (according to the lunar calendar) starts on the 28th January 2017 and is hugely celebrated worldwide by the Chinese. The Chinese New Year heralds new beginnings and a fresh start for all. On a social level, Chinese New Year is very much a family event and is a time of reunion, forgiveness, sharing and thanksgiving with festivities. In 2017 Chinese New Year falls on Saturday 28th January 2017 at 08.07 China (Lunar calendar), Saturday 28th at 00.07 United Kingdom, Friday 27th 16.07 California USA, and Saturday 28th 01.07 Barcelona Spain, a full list of all the other countries can be found below.

Due to time differences around the world, Chinese New Year will fall what appears to be a day early in some countries. Below you will find a Chinese New Year world time converter 2017 table to assist you. This is the date you celebrate the Chinese New Year with **Ang Pow**, fireworks etc and not the date you use to place your 2017 cures and enhancers in Feng Shui (February 3rd 2017).

The Lunar Chinese New Year Day is very different from the Solar (Hsia) New Year Day. The Lunar Calendar formulates the days of the month according to the cycle of the moon whereas the solar year is governed by the sun. Although the Chinese solar year starts on a different date from the western year, the theory whereby the year is calculated on how long it takes the earth to go round the sun is the same.

The lunar cycle lasts approximately 29.5 days and in order that the start of the Lunar New Year is not too far removed from the Solar New Year, the Chinese insert an extra month, this being called an intercalary month, once every few years. This is why Chinese New Year Day falls on a different date in each of the two calendars.

Whilst the solar (Hsia) calendar starts the New Year at the beginning of Spring, which falls normally between the 3rd and 5th of February, the lunar (yueh) calendar marks the New Year on the second New moon after the winter solstice. In 2017, Lunar Chinese New Year also called the 'Spring Festival', falls on 28th January 2017 which is the New Year that is celebrated by all ethnic Chinese. The solar New Year (3rd February 2017) is not celebrated at all and only used for Feng Shui placement.

You may have come across a few websites stating that 2017 is the 4716th Chinese New Year, if you cannot find the reason, here is an answer for you:

The Yellow King's appointment was held in the spring of 2697 B.C. But they used the winter solstice day as the first day of the year. So the first winter solstice was on around December 23rd, 2698 B.C. Today's January 1st means nothing to the Yellow King. If we count that extra eight days in 2698 B.C. for a year, then year 2017 is the 4715th Chinese year.

Saturday 28th January 2017, 08.07 Hong Kong time.

This is the date that Chinese New Year would be celebrated.
